CareFusion MicroLoop Spirometer

The stylish and flexible MicroLoop Spirometer from CareFusion features a high-definition touch-screen colour display which can graphically represent either a Volume/Time curve or a complete Flow/Volume loop. Additionally, the screen can be configured to show an incentive display for use when undertaking spirometry with children.

The MicroLoop can measure up to 41 spirometry parameters and has features a storage capacity for over 2,000 patients. Its desktop docking station makes battery charging, connection to a PC for data upload and printing results very quick and simple. Using its USB connection, the MicroLoop can be connected directly to a number of compatible printers.

A desktop docking station is supplied and the MicroLoop can be purchased as a standalone unit or complete with CareFusion SPCS

Features

- Conforms to all spirometry standards (ERS - ATS (2005), BTS)
- Effortless touch screen spirometry
- Stylish new MicroLab design
- Very easy to operate using a high definition colour touch screen
- Easy load, high speed printer
- Help button for instant on-screen guidance
- Up to 45 parameters measurable (user selects only those required)
